

Concepts Beyond Profiler © Features

Profiler is an intuitive electronic medical records (EMR) software that significantly improves providers' efficiency, reduces mistakes, and provides easy accurate coding at the point of care.

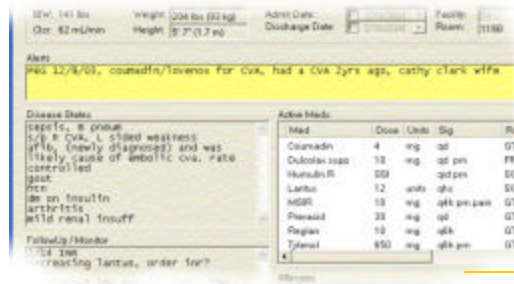

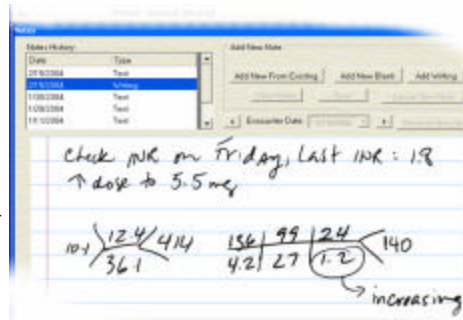

Solutions for

- Outpatient Clinics
- Mobile Practitioners, Consultants
- Universities, Rotations

Fast, Handwritten Notes

Draw diagrams and write your SOAP notes and H&P instead of typing using a Tablet PC. Profiler harnesses the convenience of the Tablet PC, allowing for handwriting recognition and drawings without the cumbersome letters of a handheld device. Include signature with your notes.

Profiler can also work on non-Tablet PC systems with a keyboard.

Rx Order Entry & Drug Database

Quickly enter and print orders and prescriptions. Easily select meds from a database of drugs that includes brand and generic names, doses, route, sig. Prescriptions are printed individually so controlled substances can be separated.

Automatic CPT Coding

Profiler's innovative algorithm automatically calculates the CPT™ code based on the provider's actions. This reduces overhead costs and billing errors, and helps ensure compliance of documentation for billing.

Lab Results

Enter and view lab results and check trends and high / low values.

Lab Type	Date	Value	U	CT
BNP	1/21/2004	132	L	3.9 (131-145) (3.8-4.2) (94-112)
	1/11/2004	134		4.7
CBC	1/21/2004	5.3		12.7 (5.0-11.3) (5.1-11.4)
	2/11/2004	10.2		14.1
PT/INR	1/20/2004			1.12 L (1.1-1.3)
	1/21/2004			1.37 L
	1/21/2004			1.74 L

ICD Codes

Assessments can be selected from the complete ICD-CM database for easy billing.

Patient Census & Profile

See on one page a complete profile of the patient, including the patient's Problem List, Active Meds, Alerts, Items to Follow Up / Monitor, and Allergies. Check the Patient Census by facility with their room number and follow up notes before making rounds.
